# Press Release

## **New Ground Bond Tester provides 60 Amps of Test Current.**

### **Model 2660, enhanced Ground Bond tester provides advanced technology at a cost effective price.**

Lake Forest, Illinois, Feb. 2003 Announced today by Slaughter Company, a leading manufacturer of electrical safety testing instruments, is the addition of the 2660 to their line of enhanced Ground Bond testers. The 2660 is a 60 amp Ground Bond tester designed to provide enough test current for products with higher input current ratings. The 2660 includes many new features such as a liquid crystal display, electronic dwell, test setup memories and advanced remote control. The LCD will allow operators to view clear and accurate test results and set up parameters, electronic dwell will provide consistent, accurate timing and testing while the test setup memories will allow test parameters to be stored and recalled for ease of use. The basic remote control provides an operator all the remotes required to configure the instrument through simple PLC relay control. This allows the 2660 to be easily integrated into any production line test station.

#### **Additional Features Include:**

Milliohm Offset Capability  
Adjustable Output Current & Milliohm Trip Current  
User Selectable Output Frequencies

No Load Setup  
Front Panel Controls  
Line & Load Regulation

For over 45 years, Slaughter Company has been providing innovative, dependable and cost-effective solutions for electrical safety testing. Contact the company at 1-800-504-0055, e-mail at [info@hipot.com](mailto:info@hipot.com) or visit our site on the World Wide Web at <http://www.hipot.com>
