Press Release

Slaughter Company releases new Short Form Catalog.

Newly released catalog covers the latest electrical safety testers including new line of Enhanced Hipot Testers.

Lake Forest, Illinois, April 2003 - Announced today by Slaughter Company is the release of their new Short Form Catalog. Slaughter's complete line of microprocessor controlled Hipot, Ground Bond and Insulation Resistance testers are featured in this catalog. New to this catalog is their line of enhanced UL listed Hipot testers, designed with the latest technology and safety features. Additional sections include a quick selection guide, a complete list of accessories and a company history.

The quick selection guide is formatted in an easy-to-follow grid layout so that customers can choose the appropriate instruments for their applications. This selection guide covers Slaughter's complete line of electrical safety testing instruments. The accessory section includes Slaughter's extensive inventory of accessories and has all ordering information available including part number, description and the corresponding model that is used with each accessory. Also included in the Short Form Catalog is a company history which provides details on Slaughter's history dating back over 50 years. In addition the Short Form Catalog covers the various warranties and benefits that have shaped Slaughter's reputation of world class service and support. Customers can contact the company for a copy of the Short Form Catalog or they download a PDF right from the website.

For over 50 years, Slaughter Company has been providing innovative, dependable and cost-effective solutions for electrical safety testing. Contact the company at 1-800-504-0055, e-mail at info@hipot.com or visit our site at <http://www.hipot.com>
