Press Release

New Electrical Safety Testing Seminar for Modular and Manufactured Homes

Dielectric Withstand Testing of Manufactured / Modular Homes and RV's will be held on September 22nd, 2006 at Michigan City, IN.

Lake Forest, Illinois, July, 2006 - Announced today by Slaughter Company is a new electrical safety testing seminar developed specifically for manufacturers of Manufactured / Modular Homes and RV's. The seminar titled "Dielectric Withstand Testing of Manufactured / Modular Homes and RV's" will provide a comprehensive overview of electrical safety testing and how it relates to Manufactured / Modular Homes and RV's. Included in the seminar will be a review of the basic concepts of electricity, an introduction to electrical safety testing, a review of testing common components in Manufactured / Modular Homes, a basic circuit overview, a discussion of the requirements for electrical safety testing and an in-depth look at Dielectric Withstand testing including a "hands-on" portion to analyze real life application problems.

The seminar will be held on September 22nd, 2006 at Michigan City, IN at the Blue Chip Casino. The seminar will begin at 9:30 with a continental breakfast and it will end at 2:30. Lunch and refreshments are also included.

The seminar is beneficial for anyone involved in the testing of Manufactured Homes, Modular Homes and RV's. There is a \$50 charge for this comprehensive seminar. To register visit their website at www.hipot.com/seminar.
