Press Release

New Enhanced Line of Hipot Testers Receive UL Listing Mark

The 2900 series has received the C-UL-US listing mark.

Lake Forest, Illinois, Nov. 2002 - Announced today by Slaughter Company, a leading manufacturer of electrical safety testing equipment, is the addition of the C-UL-US listing mark to their 2900 series line of enhanced hipot testers.

Underwriter's Laboratories is one of the most recognized safety agencies in the world. The C-UL-US mark provides safety certification acceptable in the United States and Canadian markets. The file number that the 2900 series is covered by is E204261. The listing mark provides operator safety by ensuring that the 2900 series has been inspected and passed all the tests called out in UL Specification 3111.

These tests include dielectric strength tests, ground bond and insulation resistance tests. Having passed these tests means that the 2900 series design and operation has been determined to be safe for normal operator usage. The UL listing mark also complies with National Recognized Testing Laboratory (NRTL) requirements from The U.S. Department of Occupational Safety and Health Administration (OSHA) making the 2900 series compliant with regulations for a safe workplace.

The 2900 series of enhanced hipot testers consist of three separate models. The 2925 is a 5KV AC Hipot tester. The model 2935 is a 5KV AC Hipot, and 6KV DC Hipot tester, while the model 2945 is multi-function 5KV AC /6KV DC Hipot with a built-in Insulation Resistance. All models include advanced features and technology including, microprocessor control, a liquid crystal display, electronic ramp and dwell, test setup memories and PLC remote control. The 2900 series offers these features at prices starting as low as \$995.

For over 45 years, Slaughter Company has been providing innovative, dependable and cost-effective solutions for electrical safety testing. Contact the company at 1-800-504-0055, e-mail at info@hipot.com or visit their site on the World Wide Web at <http://www.hipot.com>
