# Press Release

## Entry-Level Test System Will Perform AC Hipot, DC Hipot, Insulation Resistance and High Current Ground Bond Tests

### This new system will provide up to 60 Amps of Ground Bond Test Current

**Lake Forest, Illinois, Nov. 2003** — Announced today by Slaughter Company is an electrical safety test system that will perform AC Hipot, DC Hipot, Insulation Resistance and High Current Ground Bond tests. These tests are four of the most commonly performed electrical safety tests. The system consists of Slaughter's 2900 Series series of Hipot testers and the 2660, enhanced 60 Amp Ground Bond tester. These two families can be interconnected to form a complete test system, which enables manufacturers to perform these electrical safety tests with a single test button. This is beneficial for manufacturers, specifically for those that need to perform a higher current Ground Bond tests together with Hipot tests.

There are three models in the 2900 Series of enhanced Hipot testers. The 2925 is an AC only Hipot tester. The 2935 is an AC/DC Hipot tester and the 2945 is an AC/DC Hipot tester with a built-in Insulation Resistance tester. The 2660 is Slaughter's enhanced 60 Amp Ground Bond tester. Any model of the 2900 Series can be interconnected to the 2660. This allows the manufacturer to customize the test system to their specific testing needs. Available configurations are:

AC Hipot & 60 Amp Ground Bond  
AC Hipot, DC Hipot & 60 Amp Ground Bond  
AC Hipot, DC Hipot, Insulation Resistance & 60 Amp Ground Bond

These test systems are feature rich and cost-effective. Advanced features include a liquid crystal display, multiple test memories, electronic ramp and dwell, PLC remote control, milliohm offset and adjustable output current trip.

For over 45 years, Slaughter Company has been providing innovative, dependable and cost-effective solutions for electrical safety testing. Contact the company at 1-800-504-0055, e-mail at [info@hipot.com](mailto:info@hipot.com) or visit them at <http://www.hipot.com>
